EDUCATION

Maharshi Dayanand University, Rohtak - Haryana

Sep 2020 - Jun 2023

Bachelor of Computer Application - BCA

EXPERIENCE

SarvM.AI

Oct 2024 - Present

Frontend Developer Intern (MEAN)

Remote - Full Time

- Designed and developed web and Android applications using Angular and Ionic, aligning with agile development practices.
- Created reusable UI components and integrated full-stack features such as CRUD operations, authentication flows, and business logic workflows.
- Integrated REST APIs to handle data operations and business updates; emphasized accuracy and accountability in test-driven development.
- Collaborated cross-functionally with QA to fix bugs, perform UI enhancements, and refactor code for maintainability and performance.

PROJECTS

Job Portal ✨ Github

- Full-stack MERN application with role-based access; enables job posting, application tracking, and user authentication using secure and scalable architecture.
- **Tech-Stack:** HTML | Tailwind CSS | React.JS | Node.js | MongoDB | Shadcn-ui | Vite | Cloudinary.

Qr Code Generator ✨ Github

- UI tool developed in React.js for generating customizable QR codes with downloadable output, using optimized frontend components.
- **Tech-Stack:** HTML | Tailwind CSS | React.JS | Vite.

Banking Information System ✨ Github

- Simulated ATM system with database integration; built using object-oriented programming in Java and connected via JDBC to MySQL.
- Implemented authentication, CRUD account operations, transaction logs, and secure login workflows.
- **Tech-Stack:** Java Core | Javax | Swing | AWT | JDBC | MySQL | NetBeans.

Todo App ✨ Github

- A beautifully designed responsive mean-stack Todo App with rich UI/UX and essential productivity features. Built with Angular, Ionic, Node.js, and MongoDB.
- Implemented email otp verification authentication, signup, delete account, reset password, CRUD task operations, profile updation, and secure login workflows.
- **Tech-Stack:** Html | Scss | Typescript | Ionic | Angular | Node.Js | Express.Js | Mongoddb | Netlify Deployment.

SKILLS

Languages	HTML, CSS, JavaScript, TypeScript, Java Core
Frameworks/Libraries	React.js, Angular, Ionic, Bootstrap, Tailwind CSS, Shadcn-UI
Backend Basics	Node.js, Express.js, MongoDB, REST APIs
Concepts	Data Structures and Algorithms, OOPS, Software Development Life Cycle (SDLC)
Tools	Git, GitHub, Postman, VS Code, Agile Methodology

CERTIFICATIONS

Introduction to Java — Data Structures in Java — Frontend Web Dev Backend with Node.js (Coding Ninjas) — **Java Core Intern** (UpSkill Campus)
