## EXPERIENCE

### SarvM.AI

Oct 2024 - Present

*Full Stack Developer Intern (MEAN - Frontend Focused)*

*Remote - Full Time*

- Contributed to the development of SarvM.AI, an **AI-driven e-commerce platform** connecting over 5,000+ local nano businesses, including retailers, distributors, and customers.
- Worked across three major modules **User Web, User App, Retailer App, Retailer Web, Logistics App, Admin Panel & Static Website**, leading key UI implementations, bug fixing, optimizations, and improvements.
- Implemented responsive, scalable UIs using **Angular, Ionic, TypeScript**, and **Tailwind CSS**, improving mobile and web performance by 25%.
- Collaborated with QA and backend teams to deliver production releases, following **Agile methodology** with daily stand-ups and bi-weekly sprints.
- Developed and refactored reusable UI components, reducing code duplication by 30% and improving overall scalability and maintainability through structured code reviews and modular architecture.
- Collaborated with backend developers to fix bugs and optimize API integrations, enhancing data flow consistency, debugging efficiency, and version control practices using Git.

## PROJECTS

### Household Application

- Collaborative **MEAN-stack e-commerce platform** built by the frontend team using Angular and Node.js, supporting 4+ categories of products and services for urban households.
- Contributed to approximately **35-40%** of the frontend, delivering major modules such as **Home (Category, Subcategory, Shop Listing)**, **Profile**, **Order Management (Active/Past Orders, Order Details, UPI Payments)**, **Referral Module**, **Settings**, **ISD Code**, **Referral Module** and **Help**.
- Implemented responsive UI and enhanced UX using **Angular components**, **Tailwind CSS**, and lightweight custom CSS, ensuring cross-device compatibility and fluid navigation.
- Tech Stack:** Angular | TypeScript | Tailwind CSS | CSS | HTML | Node.js | Express.js | MongoDB

### Job Portal 🐙 Github

- Full-stack **MERN application** with **role-based access control**, allowing job posting, candidate application tracking, and secure JWT authentication.
- Optimized **frontend state management** using React hooks and modular components, improving scalability and code reusability.
- Tech Stack:** HTML | Tailwind CSS | React.js | Node.js | MongoDB | Shadcn-UI | Vite | Cloudinary

## SKILLS

Programming Languages	HTML, CSS, JavaScript, TypeScript, Java Core
Frameworks/Libraries	Angular, React.js, Ionic, Bootstrap, Tailwind CSS, Shadcn-UI
Backend	Node.js, Express.js, MongoDB, REST APIs
Concepts	Data Structures and Algorithms, OOP, SDLC, Agile Methodology & Nlp-Llm
Tools	Git, GitHub (CI/CD), MongoDB Compass, Android Studio, Postman, Docker, Vs Code, Clickup & Jira

## EDUCATION

**Maharshi Dayanand University, Rohtak - Haryana**

Aug 2020 - Jun 2023

Bachelor of Computer Application - BCA

## CERTIFICATIONS

Introduction to Java — Data Structures in Java — Frontend Web Development

Backend with Node.js (Coding Ninjas) — Java Core Intern (UpSkill Campus)
